

GLYSANTIN® G05®

GLYSANTIN® G05® are a premium-grade coolant that contain silicates. The product is a hybrid coolant. It contains a mixture of inorganic and organic corrosion inhibitors to protect the cooling system. Due to its nitrite content this product is especially recommended for use in heavy-duty engines. Additionally, the product is especially suitable for cast iron engines of classic cars from the 50's to the 80's.

GLYSANTIN® G05® is colored yellow.
